

MAXITROL[®] myfire[®] – Initial App Setup

DOWNLOAD THE MYFIRE APP

To download the myfire app search for “myfire” at the Apple App Store or at Google Play.

For more information go to:
www.myfireapp.com

WI-FI

Make sure your Home network Wi-Fi is connected with your smart device **BEFORE** opening the myfire app.

Note: To set up a WiFi network, your router must meet the following minimum requirement:

- **Standards:** The router must support the IEEE 802.11n/g/b standards.
- **Security:** Encryption must be WPA2. Please note that WPA3 or the mixed mode “WPA2/WPA3” is not supported by the WiFi Box V2 and may cause errors with the WiFi Box V3.
- **Network settings:**
 - **Multicast/mDNS** must be enabled for the WiFi Box V2.
 - The **Wi-Fi name (SSID)** must be visible.
- **Frequency band:** The router must operate in the 2.4 GHz frequency band.
- **Channel Management:** An automatic channel search is recommended to avoid interference and ensure the best connection.

To use the WiFi Box, your smart devices must meet the following minimum requirements:

- **Operating system:** The device must run at least iOS 15 or Android 10.
